(54) Title: POLYMERIZATION CATALYST FOR POLYESTER, POLYESTER, AND PROCESS FOR PRODUCING THE SAME

WO 02/057335 A1

(54) 発明の名称: ポリエステル重合触媒、ポリエステル、およびポリエステルの製造方法

(57) Abstract: A polyester which is produced with a polymerization catalyst containing metals other than antimony and germanium as major metallic ingredients and which is reduced in filter clogging during molding, etc. The polyester contains at least one member selected from the group consisting of alkali metals, alkali metal compounds, alkaline earth metals, and alkaline earth metal compounds and at least one member selected from the group consisting of aluminum and compounds thereof, the contents of these satisfying the following relationships (1) and (2). [M] < 0.05 (1) [M] / [Al] ≤ 20 (2) ([M] and [A] indicate the total content of the alkali metal atoms and alkaline earth metal atoms and the content of the aluminum atoms, respectively, both in terms of mol% based on the acid ingredient(s) contained in the polyester.) The polyester is usable in a fiber, film, hollow molding, etc.

Abstract (Basic): WO 200257335A1

NOVELTY - A polyester contains alkali metal or compounds and
alkaline earth metal compound and aluminum compound in an amount
satisfying (1) and (2).

DETAILED DESCRIPTION - A polyester contains alkali metal or
compounds and alkaline earth metal compound and aluminum compound in
an amount satisfying (1) and (2),

(M) less than 0.05 (1)

(M) / (Al) at most 20 (2)

M=total amount of alkali and alkaline earth metal atoms based on
acid components; and

Al=amount of Al atom based on acid components.

INDEPENDENT CLAIMS are also included for:

(A) production of polyester with a polymerization catalyst containing metals other than antimony and germanium as major metallic ingredients

(B) Polyester further containing a phosphorous compound and the amount of components satisfying (4) -(6). 0.1 at most (M) at most 150 (4), (M) / (Al) at most 40 (5), (P) / (A) at least 0.01 (6) wherein (P)=the amount of P atom in ppm,

(C) Polyester comprising Li, Na, K, be, Mg, Ca or compounds thereof, Al or compounds thereof, phosphorous compound wherein the amount of the metal compounds is 7.0 mol per 106g of the polymer,

(D) Polyester which contains Al or P compounds wherein the ratio of P to Al in ppm is 0.01-50,

(E) Polyester containing a P compound and a phenol compound wherein the total amount of metal atom is 100 ppm or less based on the total of the polymer,

(F) Polyester wherein the ratio of P to Al in ppm is 0.5-20,

(G) Preparation of the polyester,

(H) Polyester polymerization catalyst containing Al and P,

(I) Polyester polymerization catalyst wherein the heat stability parameter (TS) of polymerized polyethylene terephthalate satisfies formula (9),

TS less than 0.20 (9)

TS=obtained by drying 1g of PET having an intrinsic viscosity of 0.64-0.66 dl/g at 1300C for 12 hours, and then measuring the intrinsic viscosity while the temperature is maintained at 300degreesC for 2 hours, and finally calculating based on the formula $TS=0.245((IV)-1.47-(IV)-1.47)$, (H) a catalyst wherein the activity parameter satisfies the formula (10),

AP (min) less than APX (min) (10)

AP=the necessary amount of time (min) required to polymerize PET having an intrinsic viscosity of 0.65dl/g at 275degreesC under 0.1 Torr using certain amount of catalyst, and

APX=the amount of time using only the metal or the metal compound in the same amount as for AP, and (I) a catalyst having Al carboxylate dissolved in water and /or organic solvent.

USE - Used for the preparation of polyester. The polyester is used for fiber, film, hollow molding, etc.

ADVANTAGE - The catalyst has good activity and improves the heat stability of the polyester.

pp; 119 DwgNo 0/0

Technology Focus:

TECHNOLOGY FOCUS - INORGANIC CHEMISTRY - The total of alkali and alkaline earth metal is 25 ppm or less. The amount of Al or compound thereof is of formula (7) and that of P is of formula (8).

ORGANIC CHEMISTRY - The amount of Al is added at 0.001-0.1 mol% based on the acid components.
